DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Halford (2,772,478). Halford shows a device 10 comprising a finger ring 35 and a hook 38 attached thereto. Since the device is made of a metal or hard material it is held that it is capable of being used as a denture remover. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Drawings

The corrected or substitute drawings were received on June 5, 2003. These drawings are not approved.

The drawings are objected to because more reference numerals are needed to identify the different parts of the invention, i.e. the hook and the ring (note the form of

the drawings in the patent to Halford). Also, any reference numerals used in the drawings must be mentioned in the specification. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection. It is noted that applicant mentions Doctrine of Equivalents. The doctrine of equivalents arises in the context of an infringement action. During *ex parte* examination, the doctrine of equivalents would be considered in a determination under 35 USC 112, sixth paragraph, which has not been applied in this case. Also, applicant appears to be arguing that the previous reference to Hammerlund is nonanalogous art. "Arguments that the alleged anticipatory prior art is 'nonanalogous art' or 'teaches away from the invention' or is not recognized as solving the problem solved by the claimed invention, [are] not 'germane to a rejection under section 102.'" *Twin Disc, Inc. v. United States*, 231 USPQ 417, 424 (Cl. Ct. 1986) (quoting *In re Self*, 671 F.2d 1344, 213 USPQ 1, 7 (CCPA 1982)).
